

Benjamin Gephardt

Accessibility-Focused Front-End Developer | Registered Behavior Technician

Colorado Springs Metro, CO | (512) 538-8900 | bengephardt@gmail.com
github.com/BenGephardt | linkedin.com/in/bengephardt | bengephardt.github.io

PROFESSIONAL SUMMARY

Front-end developer and Registered Behavior Technician with three years of clinical ABA experience and a BFA in Illustration. Builds and audits accessible, WCAG-compliant interfaces, and spent those same three years collecting clinical data on a tablet during sessions, learning firsthand what happens when software fails the person using it.

TECHNICAL SKILLS

- **Accessibility:** WCAG 2.2 AA, Section 508, ARIA, Axe DevTools, accessibility auditing, screen-reader and keyboard testing
- **Languages & Frameworks:** JavaScript (ES6+), React 18, React Router, HTML5, CSS3, CSS Grid, Flexbox, responsive design
- **Tools & Platforms:** Vite, Git, GitHub, service workers/PWA, REST APIs, Figma, Squarespace CMS
- **Clinical:** Applied Behavior Analysis, prompt-level data collection, clinical documentation, autism spectrum disorders

TECHNICAL PROJECTS

GridBoard: Accessible On-Screen Keyboard

Vanilla JavaScript, CSS, ARIA

bengephardt.github.io/GridBoard · github.com/BenGephardt/GridBoard

- Built a dependency-free on-screen keyboard for users with limited motor input. Scores 100/100 on Lighthouse accessibility with zero axe DevTools issues.
- Self-audited the finished build and found four failures no scanner caught, including Shift being unimplemented: a user who couldn't reach a physical keyboard couldn't type a question mark. Documented openly in the repo.
- Fixed touch targets failing WCAG 2.5.8 by switching mobile rows to flex-wrap with a 44px minimum, after an auto-fit grid approach failed to wrap.

Wandering Arcanum: 5e Spellbook

React 18, React Router, Vite, service worker

wandering-arcanum.vercel.app · github.com/BenGephardt/wandering-arcanum

- Built a searchable 5e spellbook SPA scoring 100/100 on Lighthouse across performance, accessibility, best practices, and SEO.
- Worked around an API that can't filter by class and level together, fetching both lists in parallel and intersecting with a Set.
- Wrote a custom service worker with a cache-first strategy, so repeat lookups are instant and the app works offline.

PROFESSIONAL EXPERIENCE

Alpine Autism Center, Colorado Springs, CO

Registered Behavior Technician

June 2023 – Present

- Deliver 1:1 ABA therapy to a caseload of 9 clients, running 4–5 sessions per day and roughly 15 per week.
- Run skill acquisition programs in Skills Developing (children and teens) and Skills Living (adults), recording prompt-level trial data (correct, prompted, and incorrect) in real time during sessions.
- Capture language and behavior data throughout sessions, then write session notes for insurance companies and for parents.
- Work directly with BCBAs to implement individualized behavior intervention plans and adjust based on session data.

Front-End Developer (Contract)

Nov 2025 – Jan 2026

- Redesigned the center's public website (alpineautismcenter.org). Kept it on Squarespace deliberately, since as a nonprofit they can't retain a developer for every content change.
- Restructured the information architecture around what families searching for autism services need to find first; wrote custom CSS and JavaScript to clean up mobile rendering.
- Documented WCAG-compliant guidance for staff and trained the administrator hands-on; she maintains the site herself now.

Earlier: Bookstore Shift Lead, Half Price Books (2019–2023) · Bookselling and food service roles (2014–2019) · Occasional freelance illustration and design (2013–2022)
